

## Teleporting

### Open File

1. Open “teleport.py”
2. Press F5

### What has happened?

### Find out your IP address

1. Click on “LX Terminal”
2. Type `ifconfig | grep "inet addr:"`
3. The text after “inet addr” is your IP address (it has 4 sets of number and dots in between each set)  
(You may have a Wifi or Wired IP address)
4. Write down your IP address and swap it with a friend

## Controlling Someone Elses Minecraft

1. On the 4th line in “teleport.py” swap “127.0.0.1” for your friends IP address
2. Run it and see what happens
